

SQL JOIN TYPES & SET OPERATIONS ASSIGNMENTS

ROUTE

ASSIGNMENT OVERVIEW

This assignment focuses on understanding how to combine data from multiple tables using SQL JOINS and set operations.

You will work with a real-world dataset that consists of multiple related tables.

The goal of this assignment is to help you learn how to retrieve meaningful information by correctly connecting these tables.

OBJECTIVES OF THIS ASSIGNMENT

By completing this assignment, you will be able to:

- Understand relationships between tables using Primary Keys and Foreign Keys
- Use different types of JOINS to combine data:
 1. INNER JOIN
 2. LEFT JOIN
 3. RIGHT JOIN
 4. FULL OUTER JOIN
- 5. Identify matching and non-matching records across tables
- 6. Apply Set Operations:
 - UNION
 - UNION ALL
- Choose the correct approach based on the problem requirements.

Open the provided link and build up your database.

Data Source

Questions:

Display all movies

2- Display all movie ratings.

3- Display all movie IDs that appear in the ratings table.

4- Display movie titles along with their ratings.

5- Display movie titles and their budgets for movies that have ratings.

6- Display movies that appear in both Movies and Credits tables.

7- Display all movies and their ratings (include movies with no ratings).

8- Display movies that have no ratings.

9- Display movie title and average rating (include movies with no ratings).

10- Display all movie IDs from Movies and Ratings, matched where possible.

- 11- Identify movies that exist in **Movies** but not in **Ratings**, and movies that exist in **Ratings** but not in **Movies**.
- 12- Display a list of all movie IDs from **Movies** and **Ratings** without duplicates.
- 13- Display a list of all movie IDs from **Movies** and **Ratings** including duplicates.
- 14- Display all movie titles and all user IDs in a single column.
- 15- Display movies that have ratings from more than 10 different users.
- 16- Display movies whose average rating is higher than the overall average rating.
- 17- Display movies that appear in **Credits** but have no ratings.
