CONTEXT

You are working as a Junior Data Analyst at an E-commerce company.

The sales data you received is raw, unstructured, and inconsistent.

Your task is to organize, clean, and prepare the data so it can be used for analysis and reporting.

REQUIRED TASKS

Task 1: Workbook & Sheet Preparation

- Open the dataset file.
- Rename the main sheet to Ecommerce_Data.
- Freeze the header row.
- Adjust column widths and row heights for readability.

Task 2: Understanding the Data Structure

- Identify:
- Total number of records (rows)
- Total number of fields (columns)
- Insert a new column called Total Sales Value.

Task 3: Formatting & Data Types

- Ensure:
- Sales, Quantity, and Price columns are numeric.
- Date columns are in proper date format.
- Apply appropriate number formatting:
- Currency for monetary values.
- Standardize text formatting (Proper Case).

Task 4: Create Named Ranges

- Create a named range for:
- Sales Amount column → Sales_Amount
- Use the named range in at least one formula.
- Briefly explain why named ranges are useful.

Task 5: Convert Data to an Excel Table

- Convert the entire dataset into an Excel Table.
- Rename the table to Ecommerce_Sales.
- Add a Total Row to the table.
- Explain the advantage of using a table instead of a normal range.

Task 6: Sorting & Filtering

- Filter the table to show:
- One selected product category.
- Sort:
- Sales Amount (Highest → Lowest)
- Order Date (Newest → Oldest)

REQUIRED TASKS

Task 7: Apply Basic Formulas

- Calculate Total Sales Value using: Quantity × Unit Price
- Create a new column Sales Level using:
- IF Sales ≥ 5000 → "High"
- Else → "Low"

Task 8: Conditional Formatting

- Highlight:
- High sales values in green.
- Low sales values in red.
- Apply Data Bars to the Sales column.

Task 9: Data Cleaning

- Remove extra spaces from text fields.
- Replace missing or blank values logically (e.g., Region → "Unknown").
- Remove duplicate records if found.

Task 10: Summary Calculations

- Calculate:
- Total Sales using SUM
- Average Sales
- Count: Number of High Sales using COUNTIF
- Identify the top-selling product.
- Identify the category with the highest total sales.
- Add a short insight summary (2–3 sentences) in a new sheet.
