

Adham Ashraf Saeed

Assignment 2 (Power BI)

Load the provided dataset

Data Source

Import Data

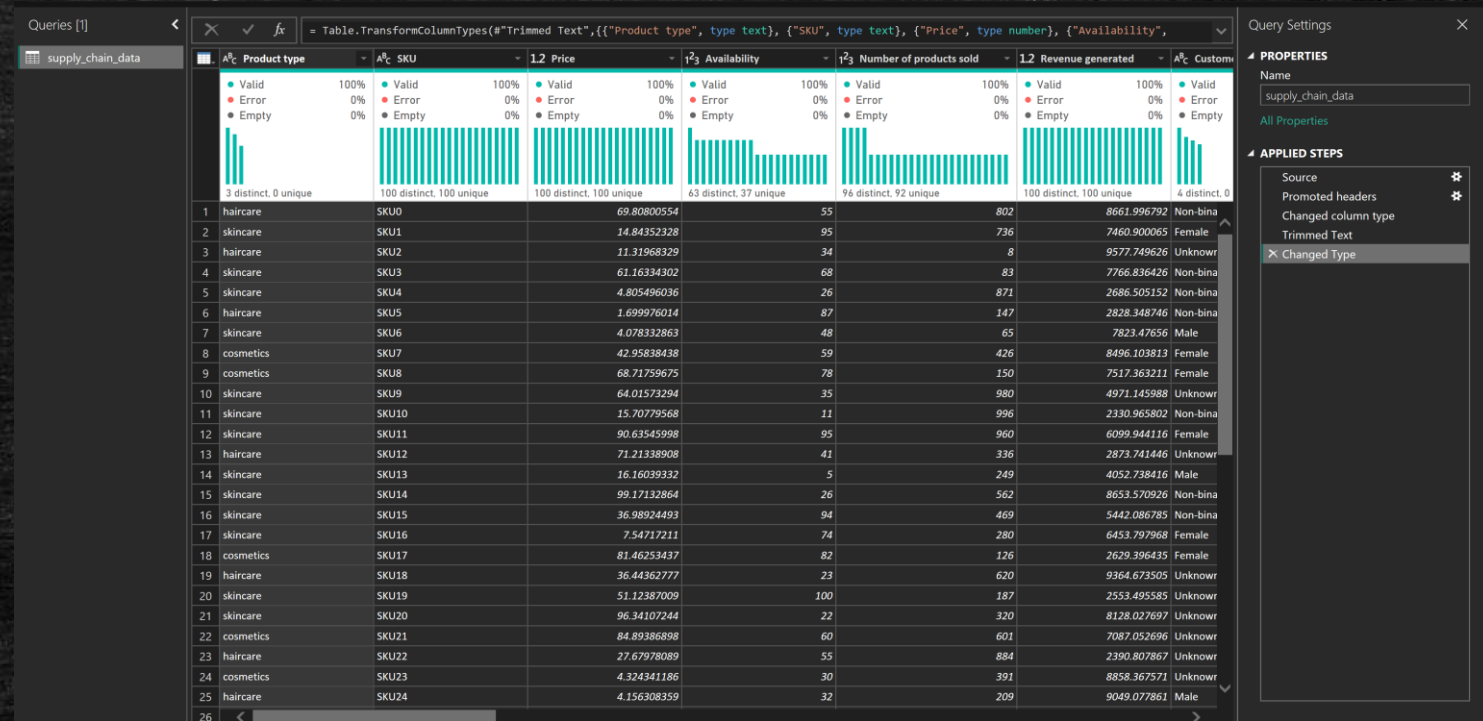

Common data sources

- Excel workbook
- Power BI semantic models
- Dataflows
- Dataverse
- SQL Server
- Analysis Services
- Text/CSV

that haven't been applied.

Import data from a text or CSV file.

Clean Data

Create Measures

Total Revenue = `SUM(supply_chain_data[Revenue generated])`

Total Products = `SUM(supply_chain_data[Number of products sold])`

Total Stock Levels = `SUM(supply_chain_data[Stock levels])`

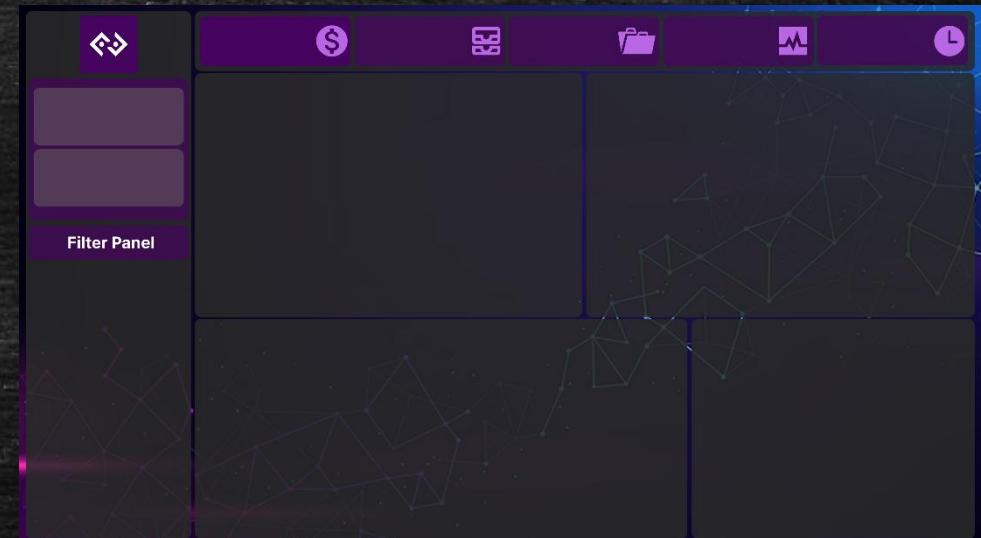

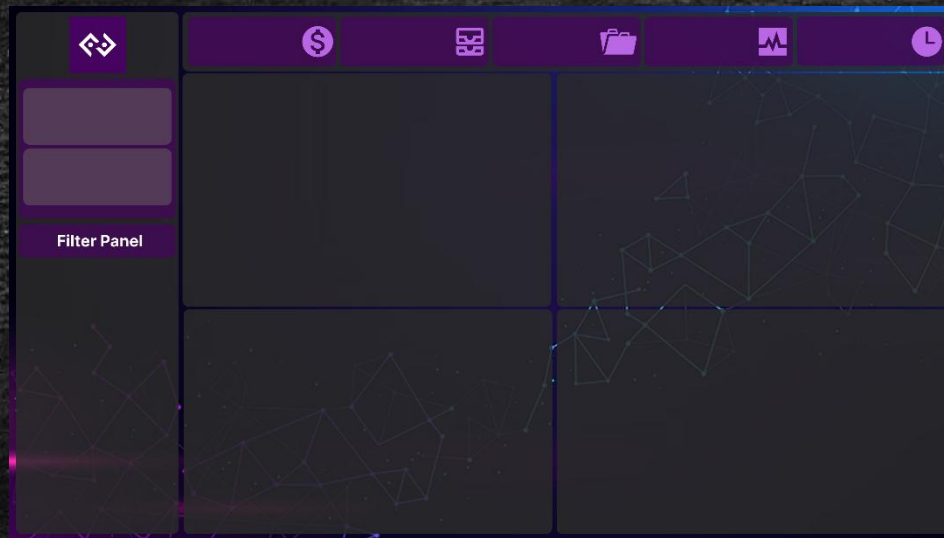

Average Shipping Costs = `AVERAGE(supply_chain_data[Shipping costs])`

Average Lead Time = `AVERAGE(supply_chain_data[Lead times])`

Products Count = `DISTINCTCOUNT(supply_chain_data[SKU])`

Measure Table	
	Average Lead Time
	Average Shipping Costs
	Products Count
	Total Products
	Total Revenue
	Total Stock Levels

Figma Design Dashboard

Key Performance Indicators (KPIs)

- Total Revenue Generated
- Total Products Sold
- Total Stocks
- Average Shipping Costs
- Average Lead Time

Total Revenue

577.60K

Total Products

46K

Total Stocks

4777

AVG Shipping Costs

5.55

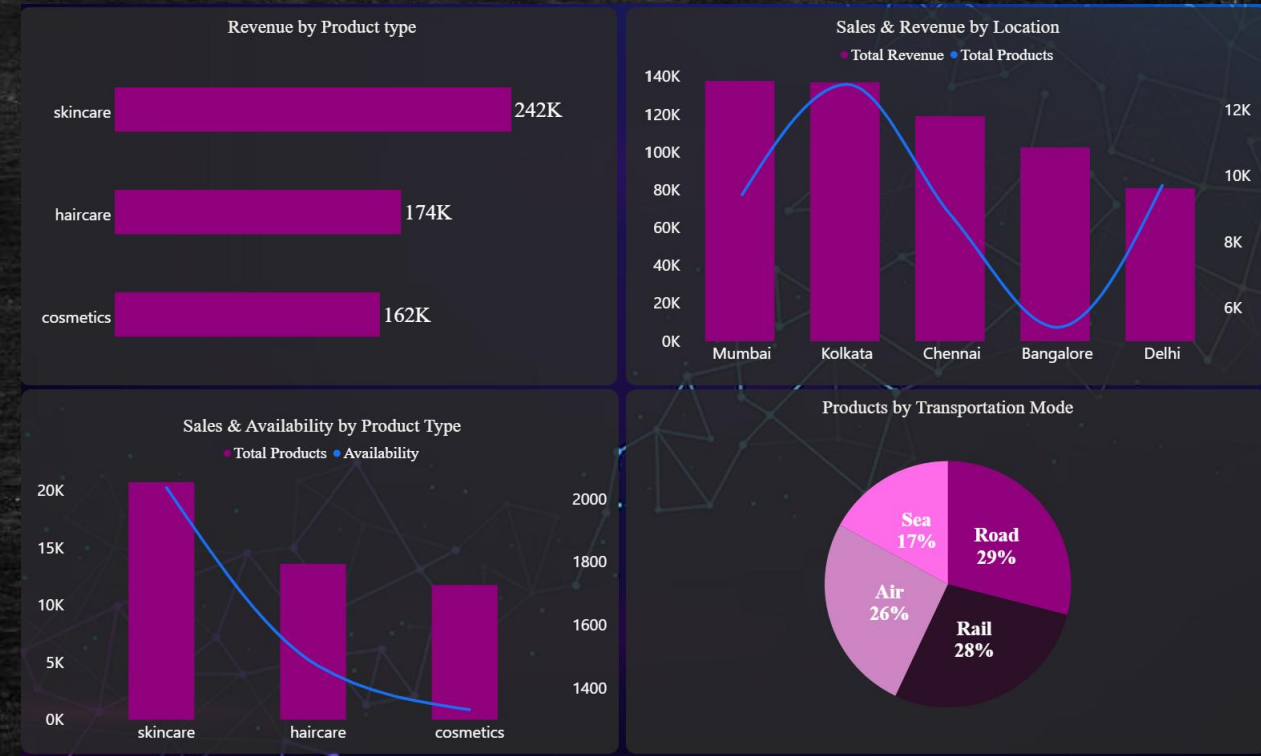

AVG Lead Time

15.96

Charts

- A bar chart showing the distribution of products sold and availability
- Another bar chart illustrating products sold and revenue generated by location
- A pie chart mapping products by transportation mode
- A bar chart for revenue generated by product type

Charts

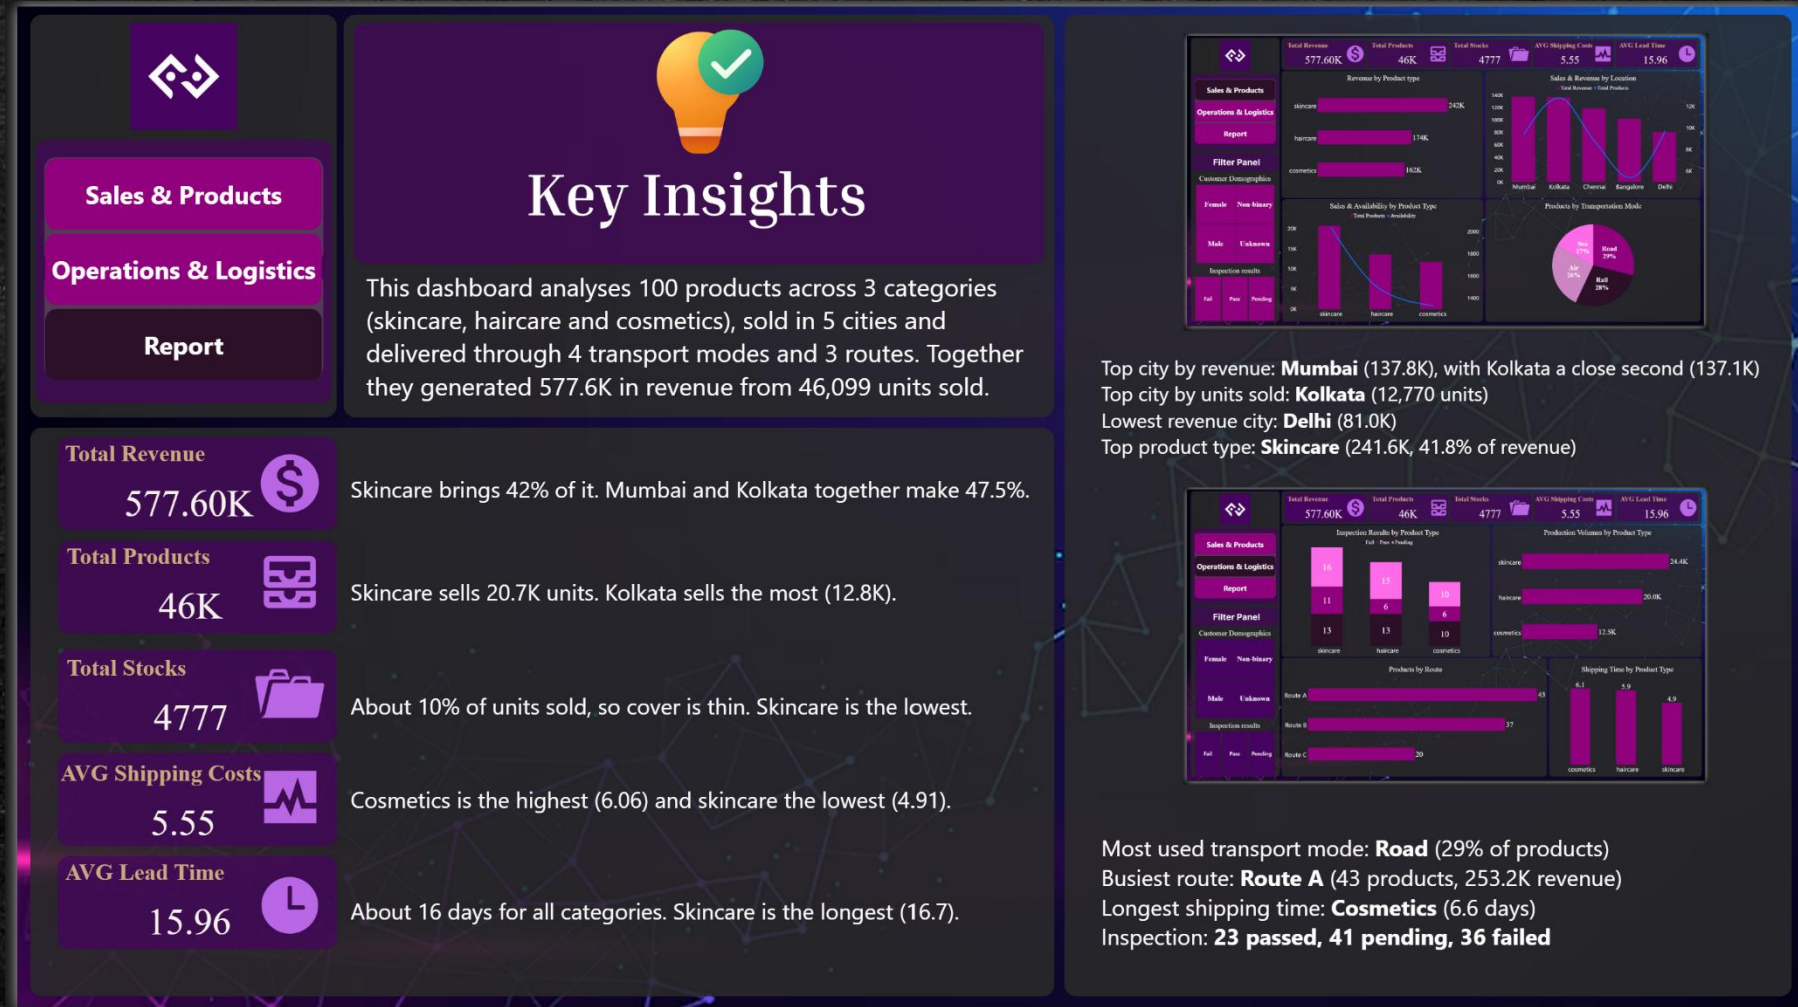

- Another bar chart showing product type by inspection result
- A bar chart displaying shipping times by product type
- A bar chart for production volumes by product type
- And finally, a bar chart illustrating products by routes
