

Adham Ashraf Saeed

Assignment 1

Task 1

Open the dataset file.

- Rename the main sheet to Ecommerce_Data.
- Freeze the header row.
- Adjust column widths and row heights for readability.

Ecommerce_Data

Task 2

Identify:

- Total number of records (rows)
- Total number of fields (columns)
- Insert a new column called Total Sales Value.

-	Result
Total Rows	9994
Total Columns	23

Total =ROWS(Ecommerce_Sales)

=COUNTA(COLUMN(Ecommerce_Sales))

W
Total Sales Value

Task 3

Ensure:

- Sales, Quantity, and Price columns are numeric.
- Date columns are in proper date format.

Apply appropriate number formatting:

- Currency for monetary values.
- Standardize text formatting (Proper Case).

Task 4

Create a named range for:

- Sales Amount column → Sales_Amount Use the named range in at least one formula.
- Briefly explain why named ranges are useful.

Answer:

- Named ranges make formulas easier to read and simplify worksheet management.

Total Sales	\$2,394,639.52
-------------	----------------

Total=SUM(Sales_Amount)	
-------------------------	--

Task 5

- Convert the entire dataset into an Excel Table.
- Rename the table to Ecommerce_Sales.
- Add a Total Row to the table.
- Explain the advantage of using a table instead of a normal range.

Answer:

- Tables provide easier sorting, filtering, and automatic expansion when new records are added.

Table Name:

Ecommerce_Sales

Resize Table

Properties

Task 6

Filter the table to show:

- One selected product category.
- Sort: Sales Amount (Highest → Lowest)
- Order Date (Newest → Oldest)

Region	Product ID	Category
A ↓ Z ↓	Sort A to Z	
Z ↓ A ↓	Sort Z to A	
	Sort by Color	>
	Sheet View	>
	Clear Filter From "Category"	
	Filter by Color	>
	Text Filters	>
	Search	
	☒ (Select All)	
	☐ Furniture	
	☐ Office Supplies	
	☒ Technology	

S	
Sales_Amount	
A↓ Z↓	Sort Smallest to Largest
Z↓ A↓	Sort Largest to Smallest
Sort by Color >	
Sheet View >	
	Clear Filter From "Sales_Amount"

B	C	D
Order ID	Year	Order Date
A ↓ Z ↓	Sort Oldest to Newest	
Z ↓ A ↓	Sort Newest to Oldest	
	Sort by Color	>
	Sheet View	>
	Clear Filter From "Order Date"	

Task 7

Calculate Total Sales Value using:

- Quantity × Unit Price

S	T	U	V	W
Sales_Amount ▼	Quantity ▼	Discount ▼	Profit ▼	Total Sales Value ▼
\$261.96	7.00	0%	=[@Quantity]*[@Sales_Amount]	

Create a new column Sales Level using:

- IF Sales ≥ 5000 → "High"
- Else → "Low"

W	X	Y
Total Sales Value ▼	Sales Level ▼	
	=IF(@Sales_Amount>=5000,"High","Low")	
\$ IF(logical_test, [value_if_true], [value_if_false])		

Task 8

Highlight:

- High sales values in green.
- Low sales values in red.
- Apply Data Bars to the Sales column.

Task 9

- Remove extra spaces from text fields.
- Replace missing or blank values logically (e.g.,
Region → “Unknown”).
- Remove duplicate records if found.

=TRIM(@Customer_Name)

Task 10

Calculate:

- Total Sales using SUM
- Average Sales
- Count: Number of High Sales using COUNTIF
- Identify the top-selling product.
- Identify the category with the highest total sales.
- Add a short insight summary (2–3 sentences) in a new sheet.

-	Result
Total Sales	\$2,394,639.52
Average Sales	\$239.63
Number of High Sales	17

=SUM(Sales_Amount)

=AVERAGE(Sales_Amount)

=COUNTIF(Sales_Level,"High")

-	Result	Sales
top-selling product	Cisco TelePresence System EX90 Videoconferencing Unit	\$22,638.48
category with the highest total sales	Office Supplies	\$953,266.36

=XLOOKUP(MAX(Sales_Amount),Sales_Amount,Product_Name)

category with the highest total sales	=XLOOKUP(MAX(AF26:AF28),AF26:AF28,AE26#)
-	Result
Furniture	\$686,267.46
Office Supplies	\$953,266.36
Technology	\$755,105.70

-	Result
Total Sales	\$2,394,639.52
Average Sales	\$239.63
Number of High Sales	17
top-selling product	Cisco TelePresence System EX90 Videoconferencing Unit
category with the highest total sales	Office Supplies
This table summarizes the available data, showing the best-selling product, total sales, average, and the category with the highest sales.
